

## Test environment

OS	OEL 7
PHP Version	7.1.1
Apache version	Apache/2.4.25
Database	MariaDB 10.1.21
Browser	Microsoft Edge 41.16299.248.0
JQuery	3.2.1
JQuery UI	1.12.1
Bootstrap	3.3.7

## Introduction

This is the result from my PHP and Javascript exercise.

Apart from signup and login panels, there is table listing of users/permissions – each with the possibility to click a row to bring up a modal dialog to edit the clicked row. Screenshots of that can be found below.

## Description / screenshots.

UserMenuUsersPermissionsAdministrationphpInfoAdministratorLogout

Filter

User name:

This permission cannot be deleted - it is in use.

## Modules.

www-folder	Short description
ajaxPermission.php	Processes ajax requests (read,create,update,delete) from permissionPage.js (webModalApp_ES6.js).
ajaxUser.php	Processes ajax requests (read,create,update,delete) from UsersPage.js (webModalApp_ES6.js).
blank.php	
login.php	
logout.php	
permissionPage.js	Instantiation of "webModalApp_ES6.js" - handles table navigation and modal dialog.
permissionsPage.php	List of permissions - has filter-form, but no pagination.
phpInfoFrame.php	Shows navbar and a frame with "phpInfo.php"
phpInfo.php	Output from phpinfo().
signup.php	
userMenu.php	
usersPage.js	Instantiation of "webModalApp_ES6.js" - handles table navigation and modal dialog.
usersPage.php	List of users - has filter-form, but no pagination.
webModalApp_ES6.js	Shared code for permissionPage and usersPage. Handles navigation in the table list of users/permissions and the associated modal dialog for editing a row.
include-folder	
clsConfig.php	
clsEditPermission.php	A class to display the modal dialog for editing permissions.
clsEditUser.php	A class to display the modal dialog for editing users.
dbConn.php	MariaDB database connection.
dbSessionHandler.php	A class that stores php session variables in a database table.
menu.php	The top navbar for this app. Menu items are displayed/hidden depending on the users permissions.
myFunctions.php	Misc. Functions
webModal.php	A shared class for the two modal dialogs. Contains the header (title) and the footer (save/delete/prev/next buttons plus message area).
webPage.php	A shared class for all the html pages. Contains the html head element and performs authentication.
